

# Plan Outline

## 1. Introduction

- Property description and location
- Acquisition information
- Funding for planning effort
- Committee members
- Planning process
- Agencies and firms involved in plan development

## 2. Existing conditions

- Water resources
- Geology
- Soils
- Vegetation cover type
- Views
- Existing trails
- Existing development and surrounding land uses

## 3. Biological survey (MNFI)

## 4. Goals

- Recreation
- Education
- Preservation
- Opportunities and Constraints Map

## 5. Management Zones

- Establish compatible uses and intensities of uses
- Designate management zones: management zones may include: Ecologically Sensitive Zone, Primitive Zone, Resource Education Zone, Scenic Zone, Natural Resource Recreation Zone, and Developed Recreation Zone.
- Opportunities and constraints
- Map of management zones

## 6. Management recommendations

- Management recommendations will be developed for each management zone and will address natural resources, recreation and education.
- The plan will include sketches to more effectively convey the low-impact development concepts, and may include some concept level design details.
- Preliminary cost estimates for the development of the project areas

## 7. Adoption and implementation strategies

- Community input Session
- Township Board approval
